ABSTRACT

Information, demonstration projects, and other activities, pertaining to solid-waste-related research, available from the U.S. Environmental Protection Agency (EPA), are contained in this document. These EPA publications are reports of the research, development, and demonstrations in progress as authorized by the Solid Waste Disposal Act of 1965. Certain conference proceedings, findings of various commissions and study groups, and other collateral literature are also available from EPA. Publications are arranged in categories which the EPA found useful in answering inquiries, and may appear in more than one category. Contents appear in the following categories: Basic Documents--Federal Solid Waste Management Program; Bibliographies on Solid Waste Management; Citizen Action and General Information; Collection of Solid Wastes; Composition and Analysis of Solid Wastes; Land Disposal; Management, Planning, and Economics; Marine Disposal; Recycling and Reclamation; Solid Waste Processing; Studies Related to Specific Solid Wastes; Surveys, Grants, Contracts, and Demonstration Programs; and Titles, Most Recent Publications. Single copies of this publication are available from solid waste management publications distribution unit, U.S. Environmental Protection Agency, Cincinnati, Ohio 45268.

Foreword

The importance of collecting and making available the information pertaining to solid-waste-related research, demonstration projects, and other activities was emphasized by the specific authorization contained in Section 204(b) of the Solid Waste Disposal Act, Public Law 89-272. The present booklet lists publications that have been collected or published by the U.S. Environmental Protection Agency in response to this directive.

--SAMUEL HALE, JR.
Deputy Assistant Administrator
for Solid Waste Management

Introduction

The solid waste management publications available from the U.S. Environmental Protection Agency (EPA) are from various sources. There are EPA publications reporting on results of the research, development, and demonstrations in progress as authorized by the Solid Waste Disposal Act of 1965. This far-reaching Federal grants and contracts program has generated solid-waste-related research in many fields. The reports from the grantees and contractors are being published by EPA as soon as available. Results of intramural research and technical investigations conducted by EPA staff are printed by EPA or submitted to professional journals so that the reports will reach the largest possible audience. In the latter case, reprints are frequently purchased and distributed by EPA. Certain conference proceedings, findings of various commissions and study groups, and other collateral literature are also available.

The publications are arranged in the categories which we have found useful in answering inquiries; publications may appear in more than one category. For convenience in ordering and to expedite distribution, each publication has been assigned a permanent number.

In gathering together and publishing this body of information on solid waste management, EPA hopes to assist those engaged in the task of finding ways to manage the Nation's burden of solid wastes. The

Agency hopes, too, that by indicating the breadth of the solid waste management field, additional people may be attracted into the field--as investigators, as engineers, as managers--wherever their talent fits. And, most important, we hope that the American citizen will see in the publications available here, evidence of progress made and of the need for continued effort in response to the solid-waste-related legislation enacted by the Congress.
